Practice Assignment Solution Template

Name:-Nikhil Nitesh Khude

Roll No:-2601105

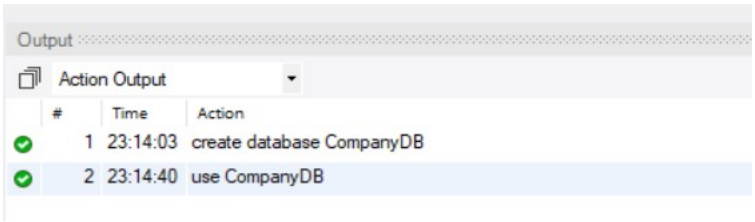

Write a query and paste a screenshot of your output below the question.

1. Create a database named CompanyDB.

   Query:- create database CompanyDB;

   use CompanyDB;

   Output:-

2. Create a table Employees with the following columns:

   Employees (EmpID (Integer, Primary Key), EmpName, Salary, JoinDate)

   Query:- create table Employees(

   EmpID Int Primary Key,

   EmpName varchar(10),

   Salary int,

   JoinDate date);

Output:-

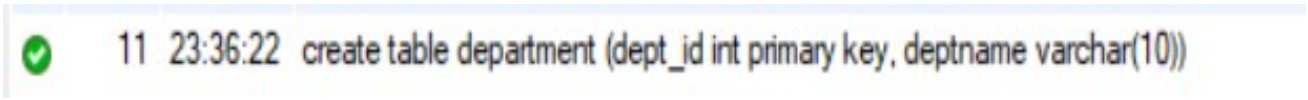

3.Create a table Departments with:

Departments (DeptID (Integer, Primary Key), DeptName)

Query:-
```
create table department (
dept_id int primary key,
deptname varchar(10));
```

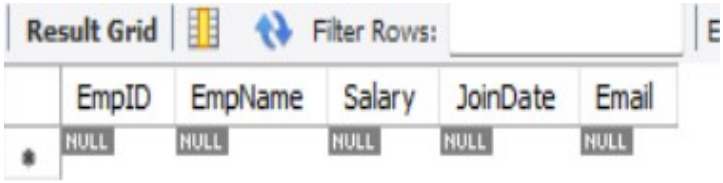

Output:-

4.Add a column Email (VARCHAR(100)) to the Employees table.

Query:- alter table Employees add column Email varchar(100);

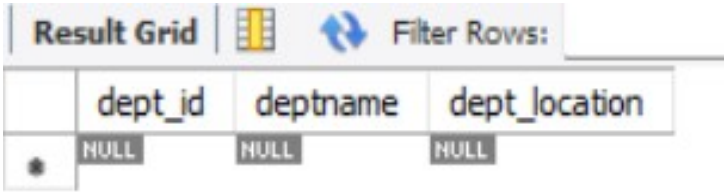

Output:-

5.Add a column dept_location to the Departments table.

Query:- alter table department add column dept_location varchar(100);

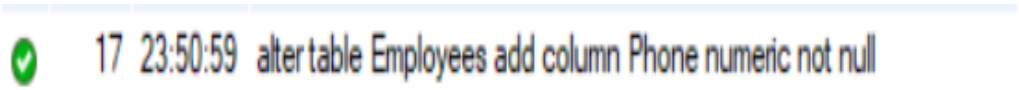

Output:-

6. Add a NOT NULL Constraint to the Phone column

Query:- alter table Employees add column Phone numeric not null;

Output:-

7.Change the size of the EmpName column from VARCHAR (50) to VARCHAR (100).

Query:-alter table Employees modify empname varchar(100);

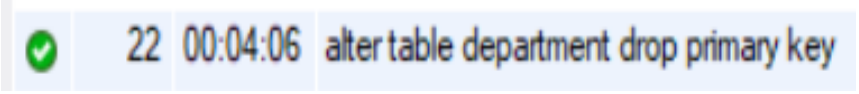

Output:-

8.Drop the primary key Constraint from Departments

Query:- alter table department drop primary key;

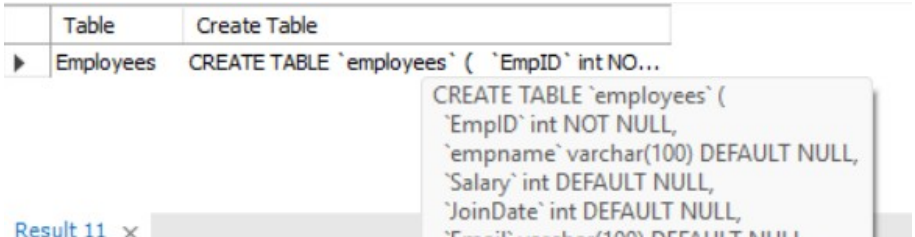

Output:-

9.Create a foreign key constraint between two tables

Query:- alter table Employees add dept_id int ; alter table Employees add foreign key Employees(dept_id) references department (dept_id);

Output:-

10.Rename the column EmpName to EmployeeName.

Query:- alter table Employees rename column empname to employeesname;

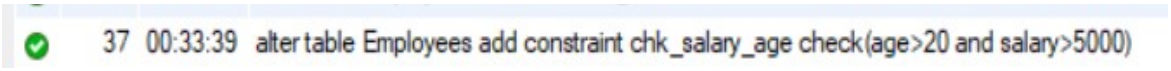

Output:-

11.Apply a CHECK constraint on the Age and Salary columns.

Query:- alter table Employees add column age int ; alter table Employees add constraint chk_salary_age check(age>20 and salary>5000);

Output:-

12.Remove the Phone column from the Employees table.

Query:- alter table Employees drop Phone;

Output:-

13.Rename the table Employees to EmployeeDetails.

Query:- rename table Employees to employeedetails;

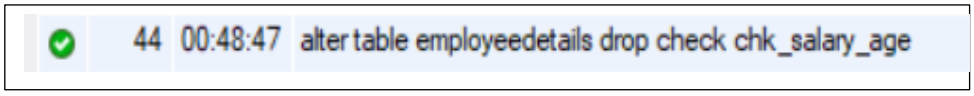

Output:-

14.Drop the CHECK constraints.

Query:- alter table employeedetails drop check chk_salary_age;

Output:-

15.Delete the Departments table permanently.

Query:- drop table department;

Output:-

16.Drop the database.

Query:- drop database Company_DB;

Output:-
